Experience

Infinite Lambda · *Global data & AI consultancy · 100+ Snowflake migrations* **August 2026 – Present**
Senior Analytics Engineer – *L6* *Remote - London*

- Built a **Bronze-Silver-Gold dbt medallion** for **Newport World Resorts** on **Snowflake + Fivetran + dbt Fusion**: **88 bronze models**, **12 facts**, **20 dims** and **11 gold marts** across FSG, Walker Digital and Salesforce
- Rebuilt **1.1M Salesforce reservations and comps** as a Kimball **supertype/subtype star schema**: a core fact with **1:1 subtype facts** (hotel, transport, yacht, jet), joined point-in-time to an **SCD2 member-tier dim** via **gaps-and-islands**
- Shipped **5 Snowflake semantic views** (**129 metrics**, **77 dims**) integrated with **Omni's semantic model**; evaluated **Omni vs Sigma** and semantic-layer options for **governed self-serve** and **natural-language BI**
- Led **data-quality reviews** catching **32% of 46M bets** misclassified, **183K reused game IDs** and an **epoch-to-date macro** silently nulling birth dates, with **impact analysis** on **incremental and snapshot models**
- Built **4 Claude Code skills** (P0–P2 **MR review**, **Snowflake table profiling**, lineage/decision-log sync, timesheet reporting) via **Google Sheets/Docs MCP**; authored the **SQLFluff standard** and **dbt Fusion** migration

Stealth Startup · *AI-powered EdTech · Learning & assessment platform* **October 2026 – Present**
Founding Analytics Engineer – *Data Platform* *Remote*

- Built the data platform from zero for a **209K-user AI EdTech** product, moving **147 MongoDB collections** (**33M+ docs**) into a tested **star schema**; shipped a live **FastAPI + DuckDB** dashboard serving exact **distinct counts and medians** in ∼**10 ms**
- Engineered a **Python EL framework** landing **idempotent, day-partitioned Parquet** on **S3** with **resume-on-retry** and **secondary-replica reads**, unblocking a **1.5M-doc collection** after **4 failed extracts**; covered by **54 pytest tests**
- Cut extract time **3x** with **wire compression**; replaced full scans with a **30-day rolling refresh** (only **0.2%** of rows change later) on **Dockerized Airflow** with **Slack alerts**; designing the move from Docker Compose to **Kubernetes (AWS EKS)**
- Designed a **Bronze-Silver-Gold dbt medallion** on **DuckDB** over S3: **132 generated bronze views**, **credential-scrubbed silver** that drops test seed rows, and a **5-domain star schema** (**20 facts**, **22 dims**) with **307 dbt tests**

Insurify · *Insurance aggregator · $600M Series B · $50M→$800M ARR hypergrowth* **May 2025 – August 2026**
Analytics Engineer – *Marketing & Growth Partnerships* *Boston, MA*

- Owned **GTM metrics infrastructure** across **30 paid channels** in a **1200-model dbt warehouse**, enabling decisions across Marketing, Growth, Finance; shipped **15 Slack alerts** and **metric-consistency tests**, resolved **200 tickets** & merged **300 PRs**
- Replaced manual partner onboarding with an **Everflow pipeline** streaming clicks and conversions through **Kinesis** into a **Redshift materialized view**, dbt-parsed with **Airflow WAP**, scaling to **150+ partners and $10M+ revenue**
- Refactored a **300GB+ RTB bidding dbt model**: **non-SARGable filters → anti-joins**, pruned upstream deps, tuned **DISTKEY and SORTKEY** – cutting **storage 100GB** and **runtime 50%**
- Investigated **cross-channel spend discrepancies** across **13 partner networks** using **end-to-end data lineage**; reconciled **LTV/CAC across channels** in **Mode**, recovering **$500K** and improving **unit economics** by **25%**
- Built a **TV multi-touch attribution model** (**$50M+/yr**) tagging branded vs non-branded SEO revenue via a **Google Search Console branded-rate dbt model** (**Airbyte → S3, Redshift**) feeding the **MMM** for **media-mix** optimization
- Built **Partnerships Spend Bot**, an **LLM-automated workflow** pulling **Asana** tickets and running **Claude** sessions to generate dbt seed PRs and post to **Slack**, replacing **3 engineers'** weekly cycles; productionizing on **Claude API + dbt MCP**

Lazard · *Elite boutique investment bank & asset manager · NYSE: LAZ · $240B+ AUM* **May 2024 – August 2024**
Data Engineer – *Financial Advisory Business Technology* *New York, NY*

- Migrated a **Monte Carlo simulation** from Jupyter to a **fault-tolerant PySpark pipeline** on **AWS EMR**, orchestrated via **Airflow** with **retryable, idempotent tasks**, reducing runtime by **40%** and productionizing daily revenue forecasts
- Built **5 Streamlit data products** backed by **Alteryx APIs** and **Snowflake**, improving self-service analytics for **30 bankers**
- Designed a **Snowflake analytics model** in **dbt** with standardized transformations, tests, and docs for BI consistency

TechSmith · *Visual communication software (Snagit, Camtasia) · 30M+ users* **January 2024 – May 2024**
Business Intelligence Engineer – *Marketing & Sales* *East Lansing, MI*

- Engineered a **real-time, event-driven pricing pipeline** using **Kafka** to ingest Salesforce data into **Databricks**, where **PySpark MLlib and TensorFlow** processed **5M+ records daily**, improving accuracy by **18%**
- Built scalable **ETL pipelines** with **PySpark** and optimized **SQL** to support **GTM reporting** for Marketing and Sales, applying **incremental processing** to cut ad-hoc turnaround time by **50%**

Technical Skills

Data Warehouse/Lakehouse: Snowflake, Redshift, BigQuery, Databricks, DuckDB, Iceberg, Delta Lake, Trino, PrestoDB, Pinot, Hive
Data Processing & Transformation: Apache Spark, Spark Structured Streaming, Flink, Alteryx, Kafka, Kinesis, CDC, dbt Core
Integration & Orchestration: Airbyte, Fivetran, dltHub, Hightouch, Airflow, Astronomer, Prefect, Mage, Dagster, Orchestra
BI & Semantic Layer: Omni, Snowflake Semantic Views, Omni Semantic Layer, Mode, Hex, Power BI, Tableau, Streamlit, Lightdash
DevOps & Cloud: Terraform, Docker, Kubernetes, Git, GitHub Actions, AWS, GCP
AI Tooling: Claude Code, Cursor, Codex, MCP servers (dbt, Asana, Slack)

Education

Texas Christian University — GPA: 3.74 ***(Magna Cum Laude)*** **Aug 2021 – May 2025**
Computer Systems Analysis & Minor in Mathematics, Fintech *Fort Worth, TX*
